

GSA CAPABILITY STATEMENT

About PWT

Perfect Water Technologies is an American Manufacturing company and maker of the Home Master product line. We specialize in residential reverse osmosis systems, whole house filtration, counter top and faucet style filters, and hydroponic gardening units. In 2017 Perfect Water Technologies, Inc. was awarded a patent for the Full Contact Remineralization System, and in 2017 a new patent for the next evolution the Full Contact UV double forced sterilization. We also introduced the patented Air Gap Catch. We are always looking for ways to bring our customers perfect water, and through continued R&D, seek to bring these better filtration solutions into your office, business, home and beyond.

PWT customers come from an array of markets including residential, government, and small business. Our undersink reverse osmosis systems delivery highly pure, pharmaceutical grade purified water, and re-mineralization systems offer Artesian Mineral Water on Tap.

Our Capabilities

PWT's water filtration products provide solutions for those looking to improve water quality. From shared office environments, to outside/indoor gardens, and residential homes.

- Meets regulatory compliance standards (EPA, NSF).
- Uses UV sterilization to fight microorganisms.
- Patented remineralization Reverse Osmosis systems add 30-60 (mg/L) of Calcium and Magnesium back into water.
- Do-it-yourself Undersink Reverse Osmosis systems install quickly saving you time.
- Portable counter-top units great for travel and small spaces.
- Whole House filtration systems process up to 100,000 gallons and deliver up to 20 gallons per minute.
- Expanded Standard Commercial Warranty with up to 5 years on some systems.
- US customer service, online and over the phone technical support.
